Fiber OWL 4 BOLT SM Test Kit

SKU: KIT-FO4B-WSSDxx (see connector options below)

Singlemode Fiber Certification Test Kit
with integrated fiber length testing

Overview

Many fiber optic network bids and Requests For Quote (RFQ) are citing cabling standards to specify the set of guidelines (such as fiber length) that the network installer must follow during the network installation. Adherence to such standards is meant to ensure the quality of the installation and guarantee that the network will perform as it was designed.

The process of testing a network installation to ensure its adherence to specified standards is called certification, and often requires hard-copy documentation as proof of adherence to standards.

The ***Fiber OWL 4 BOLT SM Test Kit*** contains the tools necessary for certifying fiber optic links against a myriad of popular cabling standards in singlemode networks.

The ***Fiber OWL 4 BOLT optical power meter*** is multimode and singlemode ready, and contains a user-friendly Fiber Link Wizard that performs link budget calculation (including integrated fiber link length testing), and sets a reference value using the characteristics of the link. This reference is the PASS/FAIL threshold and is calculated against the chosen standard. Up to 1000 fiber runs may be stored, then downloaded to a PC for report generation using our OWL Reporter software.

It also includes intelligent automated testing functions, such as automatic dual-wavelength storage and auto-wavelength recognition, which reduce testing time and human error.

The ***WaveSource SM fiber optic light source*** contains all four popular industry-standard wavelengths in a single unit, designed for accurate testing and certification of singlemode (1310nm & 1550nm) networks. Its dual-wavelength outputs are temperature-stabilized for accurate measurements.

The ***WaveSource SM*** has a built-in auto-wavelength switching protocol designed to synchronize the wavelength of the ***Fiber OWL 4 BOLT*** with the current output wavelength.

Three connector options are available (ST, SC, and FC), and is upgradeable to include 850 & 1300nm multimode sources.
